Short Resume

▸ **Positions**

  ▸ Since 2017   Full Professor in Software Engineering, University of Toulouse - Jean Jaurès

   Teacher in the Department of Mathematics and Computer Science

   Researcher in the MACAO group of the CNRS/IRIT lab

  ▸ 2009 - 2017   Associate Professor in Software Engineering, University of Rennes 1

   Teacher in the engineering school ESIR (+ Master in SE)

   Researcher in the DiverSE group, joint to CNRS/IRISA and Inria

   ▸ 2017   Visiting Professor at McGill University, CA

   ▸ 2013-2016   Research Scientist at Inria *(on leave from UR1)*

   ▸ 2010-2015   Regular visiting professor at CSU, USA

  ▸ 2008-2009   Postdoc fellow, Inria

  ▸ 2005-2008   Research associate (PhD student) at ENSEEIHT (grant, French government)

▸ **Education**

  ▸ 2015   HDR in Computer Science, University of Rennes 1

  ▸ 2008   PhD in Computer Science, University of Toulouse

  ▸ 2005   MSc in Computer Science, ENSEEIHT, Toulouse

  ▸ 2004   IUP NTIE, UT2J, Toulouse (software engineer at INEO SCLE)

  ▸ 2002   IUT in Computer Science, UT2J (Blagnac), Toulouse

Personal Introduction
Benoit Combemale, Oct. 2017

IRIT
CNRS · INPT · UPS · UT1 · UT2J

Background: Complex Software–Intensive Systems

- **Multi-engineering approach**
- **Domain-specific modeling**
- **High variability and customization**
- **Software as integration layer**
- **Openness and dynamicity**

Software Engineering: Definition

The production of **operational software** satisfying **defined standards of quality**…

… includes programming, but is **more than programming!**

The five components of Software Engineering [Meyer]:

▸ **Describe**: requirements, design, specification, doc…

▸ **Implement**: programming

▸ **Assess**: testing and other V&V techniques

▸ **Manage**: plans, schedules, communication, reviews

▸ **Operate**: deployment, installation…

Software Engineering: Definition

▸ is a **profession** dedicated to designing, implementing, and modifying software so that it is of higher quality, more affordable, maintainable, and faster to build.

▸ is a **systematic approach** to the analysis, design, assessment, implementation, test, maintenance and re-engineering of a software by applying engineering to the software.

▸ first appeared in the 1968 NATO Software Engineering Conference (to provoke thought regarding the perceived "software crisis" at the time).

Our Courses: A Long Path Together ☺

- **Master 1 ICE**

  - Génie Logiciel (GL):
    - GLa: Validation & Vérification   P1
    - *GLb - Processus de développement collaboratifs*
    - *GLc – Développement orienté test et refactoring*
    - *GLd - Qualité logicielle*
    - *GLe – Maintenance, Gestion du changement*

  - Environnement Collaboratif (EC):
    - ECa: Méthodes de développement   P1
    - ECb: Ingénierie des systèmes   P1/P2
    - ECc: DevOps   P1
    - *ECd - Maîtrise des licences d'un produit logiciel*

  - Ingénierie Dirigée par les Modèles (IDM)   P2/P3

  - Projet de développement collaboratif (PDC)   P3/P4/P5

- **Master 2 ICE**

  - Projet collaboratif tuteuré (PCT)   P2/P3/P4

UNIVERSITÉ TOULOUSE
Jean Jaurès

IRIT
CNRS - INPT - UPS - UT1 - UT2J

Course Organization

- Bookmark the **course website**
  - https://combemale.github.io

- You all need a **Github** account:
  - **https://github.com/selabs-ut2j**
  - (optional) Student pack: https://education.github.com/pack
  - We will (maybe) use: https://classroom.github.com
  - BTW, recommended: https://github.com/buunguyen/octotree

- You all need to join SE Labs on **Slack**:
  - **Workspace: https://se-labs.slack.com**
  - **Invit: http://bit.ly/2fZoMiO**

Personal Introduction
Benoit Combemale, Oct. 2017

Course Organization

- Lectures, tutorials and labs have to be <u>interactive</u>

- Lectures, tutorials and labs are all <u>mandatory</u>

- Laptops (and others mobile devices) are useless during lectures => <u>prohibited</u>

- Disclaimers:

  - my slides are a mix of French and English

  - my slides are usually just in time published, i.e. by the day/hour of the lectures (and might be outdated before)

  - You must use your preferred IDE (and I have a very limited knowledge on most of them)

UNIVERSITÉ TOULOUSE

BTW, I'm not your type checker, compiler, javadoc, stackoverflow, google...

Teach yourself, and work with others...

KEEP CALM AND DO IT YOURSELF

How to reach me

▸ Preferably at the **end of a lectures/tuto/labs**

▸ Or on **Slack** (use the right channel)

▸ Ultimately, by sending an **email** (`benoit.combemale@irit.fr`) with:

   ▸ Your **academic email** (or a comprehensible one)

   ▸ An **explicit object** starting with "[ICE1-XX] …", where XX is the course related to the email

   ▸ A **full signature** including your name, group/partners, etc.

   ▸ A **comprehensible description** of your issues

   ▸ The **related files** (diagrams, source code…)

      ▸ Rq: to export an Eclipse project, use the dedicated facility (Project's contextual menu (by right clicking) > export > Archive File…)

> *compliance_with_these_rules => a_guaranteed_response*
